AI SUMMER SCHOOL 2.0

June 3rd to 6th, 2026

Students participated in the AI Summer School 2.0 at IILM University, Gurgaon, from June, 3rd to 6th 2026, where they explored Artificial Intelligence, Machine Learning, Robotics, Innovation, Entrepreneurship, Branding, Digital Creativity through interactive workshops and hands-on activities. The programme enhanced their creativity, critical thinking, collaboration, and problem-solving skills, providing valuable exposure to future-ready technologies and innovative learning.

WORLD ENVIRONMENT DAY

ROOTS OF HOPE, HEARTS OF GREEN!

To celebrate World Environment Day, our students made a meaningful contribution by planting trees and saplings at home during their summer vacation. Through this thoughtful initiative, they embraced the importance of protecting nature and creating a greener future. Their enthusiastic participation reflects that even small actions can make a lasting impact on our planet.

"Plant a Tree Today, Grow a Better Tomorrow!" 🌿❤️

World Environment Day Activity (Classes VI–VIII):
To commemorate World Environment Day, students of Classes VI–VIII enthusiastically participated in DoE activities promoting environmental responsibility. Class VI created posters on waste segregation, Class VII designed innovative Best Out of Waste crafts, Class VIII expressed the importance of a Clean School, Green School through paintings, reinforcing the values of sustainability and environmental conservation.

International Yoga Day

Yoga is the journey of the self, through the self, to the self.

To celebrate International Yoga Day, students enthusiastically participated in a Yoga at Home activity during the Summer Break.

Building upon the yoga asanas learnt in school, students practised various postures, breathing exercises, and meditation techniques in the comfort of their homes.

The activity encouraged students to adopt yoga as a part of their daily routine, promoting physical fitness, mental well-being, self-discipline, and mindfulness. Students shared photographs and videos of their practice, reflecting their commitment to a healthy lifestyle and the successful application of the skills acquired at school.

The initiative served as a gentle reminder that yoga is a lifelong practice that nurtures harmony between the body and mind, inspiring students to embrace wellness as a way of life.

NEW LOOK, SAME MAGIC! ✨

We've added a brand-new learning centre—Literacy Language 2—to make our learning spaces even more engaging. Here's a glimpse of the beautifully transformed Nursery C and the thoughtful planning behind each learning centre.

Our classrooms are ready, our walls are waiting, and so are we! We eagerly await the return of little footsteps, joyful giggles, and cheerful laughter to bring these spaces to life once again.

Honouring a Legacy of Excellence!

“A teacher may retire from the classroom, but the lessons they leave behind inspire generations.”

Banyan Tree School bid a heartfelt farewell to Ms. Madhabi Guha, esteemed Mathematics Teacher, on her superannuation after 27 years of dedicated service. The ceremony was filled with gratitude, fond memories, and warm tributes from the Principal and colleagues, celebrating her unwavering commitment, humility, and passion for teaching. As a token of appreciation, she was presented with a memento and bouquet. Though she retires from her official role, her wisdom, values, and inspiring legacy will forever remain an integral part of the Banyan Tree School family.

Nurturing Minds, Empowering Futures

Every child deserves to be seen, heard, and supported.”

Banyan Tree School conducted a Teacher Capacity Building Workshop on ‘Identifying Red Flags in Learners and Facilitating Early Support’, on 30th June 2026, facilitated by Ms. Arushi Raheja, Counselling Psychologist from Waby Saby Counselling. Through interactive activities, real-life case studies, and insightful discussions, teachers learnt to identify early signs of emotional, behavioural, and neurodevelopmental concerns in students. The workshop emphasised empathy, active listening, timely intervention, and collaboration with parents and counsellors. Reinforcing the school’s commitment to holistic education, the session empowered educators to create emotionally safe, inclusive, and supportive learning environments for every child.

Think. Tinker. Transform: A STEM & Robotics Experience

A workshop on STEM & Robotics was organised for teachers on 30th June 2026 in preparation for the school's new addition, the STEM Robotics Lab. The session, conducted by Ms Aahi, aimed at familiarising teachers with the concepts, tools and possibilities of STEM and Robotics.

The workshop provided teachers an opportunity to explore, experiment and understand the practical applications of robotics and STEM-based learning. It focused on equipping teachers with the knowledge and confidence to effectively integrate these emerging technologies into classroom learning and create engaging, hands-on experiences for students.

The session was an enriching step towards making learning more innovative, experiential and future-ready.

Honey never spoils.

Archaeologists have found edible honey in ancient Egyptian tombs that is over 3,000 years old!

Octopuses have three hearts.

Two pump blood to the gills, while one pumps it to the rest of the body!

Bananas are berries, but strawberries aren't!

Botanically speaking, bananas fit the definition of a berry, while strawberries don't!

DO YOU KNOW?

Interesting facts, fun trivia,
and fascinating insights
to spark curiosity!

A day on Venus is longer than a year on Venus!

It takes about 243 Earth days to spin once, but only 225 Earth days to orbit the Sun.

Your brain uses about 20% of the body's total energy.

That's why good sleep, nutrition, and breaks are so important!

Curiosity is the spark behind every great discovery!

The Eiffel Tower can grow taller in the summer!

Heat causes the iron to expand, adding up to 15 cm to its height!

Sharks existed before trees!

They've been around for over 400 million years!

A group of flamingos is called a "flamboyance"!

The Great Wall of China is visible from space?

Not with the naked eye, but it can be seen with a camera!

Butterflies taste with their feet!

They have tiny taste sensors on their feet to check what they land on.

A teaspoon of neutron star material weighs as much as a mountain!

Stay curious, keep exploring, and never stop asking Why?
